

Introduction

E-Typ can be started in any browser using the URL <https://www.e-typ.eu/>.

Explanatory notes on the assigning rights, responsibilities, troubleshooting, starting the system, login, changing your password and general information can be found in the E-Type user manual (granting type approvals).

The technical service will be informed by e-mail if the Kraftfahrt-Bundesamt (KBA) uploads documents. These documents will be removed after around 4 weeks.

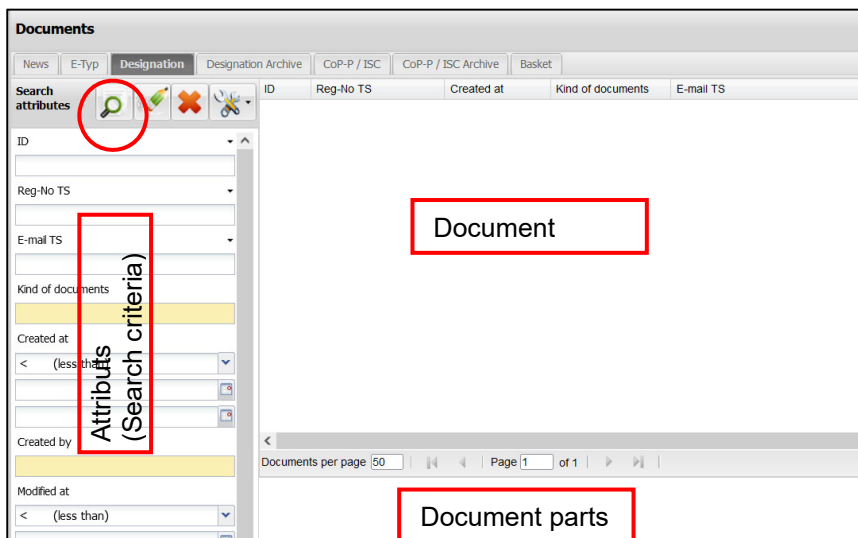

Before using the application, the technical service has to submit the "Application for participation in the document exchange system E-Typ designation" (A-2.32) for one or more user identifications.

A click on the tab "Designation" opens the workspace of E-Typ using the designation procedure.

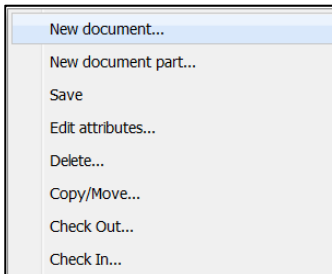

Document search

- Click the „Search” button (magnifier) in the top left corner, all attribute fields (search criteria) must be empty. In the right section all available documents will be listed.
- Alternatively enter search criteria
- After a click on a single document, document parts of this document will be visible in the lower section.

New document

- Right mouse click in the main section will open the context menu: Select "New document"
- Or using the "New" button (icon "White sheet")

- Fill in attribute fields and click on "Next". The attribute "Reg-No TS" has a default value and cannot be changed.

New document part

- A new document part can be added to the selected document with the corresponding item of the context menu or using the "New" button (icon "White sheet").

- Name: In this area, a name for the document part to be uploaded will be defined. There are no special rules for creating the name, but versions of the document part must be identifiable.
- Select file: In this area, the file to be uploaded from your own folder can be selected.
- Other Fields will be filled in automatically.
