GERMANY

Hints:

The Central Register contains only the data on driving licences issued in Germany since 01.01.1999 (plastic cards).

Driving licences issued before 1999 (paper documents) are not included in the register. These data are registered only at the local driver licensing authority that has issued the driving licence and should be requested there.

If you wish information about your penalty points, ban on driving, withdrawal of your driving licence etc., you need information from the German Register of Driver Fitness (Fahreignungsregister: FAER)
